

K-Love has been invaluable to me over the past 4 years. We have seen many life changing events such as moving across country, employers going out of business and jobs ending, deaths in the family, and the birth of our first child. After 9/11 I felt such a daily dread and concern whenever a plane flew over head or an emergency vehicle passed. Today I know great peace and joy just from a simple radio station.

It has come to my attention that my local K-Love station might be displaced should LPFM broadcaster programming be approved. I have become very dependant on my K-Love station. I know there is a large following for this station in my immediate area. Personally I know many who would agree that K-Love is an uplifting and mandatory part of their day. There is such negative that we are bombarded with daily, violence, abhorred language and sexual perversion such as Howard Stern. Please do not remove something that is providing an uplifting and motivating public service.
